squares of bezuidenhout

the experiment | may 22nd - july 30th, 2017

The Hague, July 5th 2017

Dear neighbours,

It will probably not have escaped your attention that since last month, a special experiment is taking place at the large square in the De Sillestraat. The voting round which accompanies this experiment has started and we have already received almost 100 votes. **Voting is still possible until Friday July 14th.**

The final results of the vote will be announced on **July 21st** by a letter sent by the municipality and on the website of the squares working group (www.pleinenbzh.nl).

The option that has been chosen by a **majority of the residents** will be proposed to the responsible municipal executive. After the summer, there will be a **dialogue** between the residents and the municipality **for the final design** of the square.

We would like thank you for all ideas, comments, time and patience, and we wish you a very nice summer!

Kind regards,
Annemiek, Ella, Erik, Geert en Melvin

Working group Squares Bezuidenhout East,
in cooperation with the municipality of The Hague, the Engineering agency of The Hague, and the neighbourhood council of Bezuidenhout

All available ommunication in English regarding the experiment can be found at : www.pleinenbzh.nl.
